### ABOUT ME

I'm a passionate digital experience creator with a focus on crafting beautiful, user-friendly interfaces (**UI/UX**) and developing **responsive apps**. My expertise extends to **design patterns** and writing clean code for robust, **SEO**-friendly architectures. I'm not just a software developer; I'm an architect of digital experiences, dedicated to excellence in every project I undertake.

### SKILLS

|--------------|---------|
| React        | Flutter |
| Vue          | C#      |
| Sass         | MySQL   |
| Tailwind     | NodeJS  |
| Typescript   | Java    |
| Javascript   | Unity   |
| ApolloClient | Jest    |
| Redux        | Git     |
| Webpack      | Postman |
| Maven        | IBM MQ  |
| NextJS       | AstroJS |

### EXPERIENCE

**FRONT-END DEVELOPER - M6CONNECT**  
Omaha, Nebraska, United States  
AUG 2023 – CURRENT

I playing an essential role in the creation of widgets for a software as a service (**SaaS**) application and process automation with regular expressions (**REGEX**) using **react and typescript**. I'm also improving the efficiency of the apps and performing **unit testing**.

**FRONT-END DEVELOPER MID / API MANAGER – NEXTIA**  
Mexico City, Mexico  
JUN 2022 – JUN 2023

I was **developing** apps for our clients and for the Government, these are developed with **React, Typescript** and testing with **Jest** and **Cypress** following the **SCRUM model**, I am also used **MQ - IBM** and **Java** as an intermediary Backend for asynchronously queueing requests and creating APIs. Also, I lead the development of a massive application for Currie & Brown.

**FRONT-END DEVELOPER - VENN PLATFORM**  
Mexico City, Mexico  
MAY 2021 – MAY 2022

I was redoing some modules for a **startup** using **React, Redux, Context & Axios**. I corrected the design of multiple interfaces making proper use of **UX**, among the new features are: a coupon system and a dashboard with charts and gradient styles using **chart.js** and some smooth animations using **gsap**. I made unit testing and also updated components to **typescript**.

**FREELANCE VIDEOGAME DEVELOPER – MATTE**  
Mexico City, Mexico  
MAR 2020 – APR 2020

I was in charge of **refactoring** part of the AR app with **Unity** for the new carmodel 'NISSAN frontier 2021' for **NISSAN company**, I **programmed** new functionalities such as multi-language and the creation of new kinematics, all using a high level of **OOP**.

**FRONT-END DEVELOPER – UJED**  
Durango, Mexico  
MAY 2019 – MAR 2020

I **developed** the 'Durango state language school university' (CELE) website using **Vue, Tailwind** and **Sass**, developing a user management system, allowing users to enroll in various courses. I consumed API's to allow the user to pay for course registrations, I consumed Django / PostgreSQL API's to allow the user to register. I worked with **scrum** and using **webpack** in the project.

**SOFTWARE DEVELOPER - CENTRO DE SALUD #2**  
Durango, Mexico  
JAN 2018 – MAY 2018

I **developed** an inventory control and patient registration system, a registry for the control of medicines, an inventory system for a hospital using **MySQL, C#** and **WPF**.
